

WINSACADEMY

"Security threats are becoming more complex, security is getting more expensive to implement and the industry is facing economic pressures. Sharing security best practices to achieve operational excellence is a proven method to enhance competitiveness, just as the sharing of operational experience has improved safety and reactor performance. I believe, in line with many States, that introducing certified, professional training for personnel with accountabilities for nuclear security lies at the heart of achieving operational excellence for security."

Dr Roger Howsley, WINS Executive Director

FOCUS ON

RESULTS OF THE 2015/2016 WINS MEMBERS SATISFACTION SURVEY

Over 450 WINS Members took part in the 2015/2016 annual WINS Members Satisfaction Survey. The analysis of results shows a very high level of satisfaction with our activities, consistent with previous years. We are delighted to highlight that 95% of the respondents indicate they have changed approaches to security because of their interactions with WINS. This indicator is of central importance to WINS as we highly value stakeholder feedback and use it to identify how we can best support the international community and the WINS members whom we serve. More details about the survey results are provided on the [WINS website](#). The Survey is also a useful tool to gather our members' feedback about how to improve the services we offer and to propose new activities. On behalf of the WINS team, thank you to all WINS members, we are looking forward to another productive year with you!

WINS INVOLVEMENT AT THE 2016 NUCLEAR INDUSTRY SUMMIT

Dr Roger Howsley, WINS Executive Director, has been invited to speak at the 2016 Nuclear Industry Summit (NIS), which will take place in Washington, D.C. on 30/31 March. WINS has addressed every NIS event and Dr Howsley chaired the Advisory Committee in 2014. The 2016 NIS will be followed by the 2016 Nuclear Security Summit (NSS 2016) which will gather world leaders from more than 50 countries and 4 international organisations focused on preventing nuclear terrorism throughout the globe. The NIS is a high level event that will bring together CEOs and industry leaders from around the world. Organisation of the 2016 NIS is the responsibility of the Nuclear Energy Institute and is expected to feature the WINS Academy and its achievements. Visit the 2016 NIS website for more information: www.nis2016.org/

WORDS FROM WINS ACADEMY GRADUATES

"The results which I have obtained [from the WINS Academy Programme] are simply remarkable" Indranil Bisuri, Masters of Technology, Amity University, India.
