

Urenco organised the 2014 Nuclear Industry Summit

“What makes WINS different is that it really understands that security has to be part of an organisation's strategy and an all-hazards approach to risk management.”

Paul Harding, Advisor to CEO at URENCO Ltd and WINS Board Member

FOCUS ON

WINS WEBINAR ON THE SECURITY OF RADIOACTIVE SOURCES

WINS is pleased to invite you to its upcoming webinar on the Security of Radioactive Sources: Experiences and Lessons Learned on December 2 at 16:00 CET. This first operational webinar will be professionally facilitated and will feature Ms. Jodi Ploquin (Canada) and Mr. Chris Englefield (United Kingdom) in a panel discussion on the experiences and lessons learned from developing regulatory requirements and implementing security upgrades for radioactive sources. The speakers will discuss the main challenges and solutions when strengthening the security of sources and provide both a regulator and an operator perspective. This interactive webinar will give participants the opportunity to share their opinion on various topics and to ask questions of the speakers. In order to register for this free webinar, please [click here](#).

URENCO LIMITED BECOMES WINS CORPORATE MEMBER

WINS is delighted to announce that URENCO Limited has become a WINS Corporate member. As Dr. Howsley noted, "URENCO has been a staunch supporter of WINS from the early days. We have benefitted enormously from our interactions with its excellent staff and executive management, and working with Paul Harding on the Board and Huub Rakhorst on the Nuclear Industry Summit has been a wonderful experience. I know that URENCO has also benefitted from its interactions with WINS and the implementation of some of the WINS' best practices".

WINS PRESENTATION ON BIG DATA IN MOTION: FROM HINDSIGHT TO INSIGHT

at a seminar on Nuclear Security organised by the United Nations Nuclear Young Generation (UN NYG) "Defining the limitations of conventional security and nuclear materials and how developing an integrated management system and data analytics could be used to enhance situational awareness and the timely intervention in the event of a significant alarm condition. This topic will be covered in more detail in the upcoming WINS workshop (see below). For more information about UN NYG's activities, [please visit their website](#).
