Re: Degree in Medical Imaging and Radiotherapy

Dear Mr. Gálvez Cervantes,

On behalf of the ESR Board of Directors I would like to thank you very much your letter and your request. The ESR fully supports your proposal to improve the training for Radiographers in Spain by including the Spanish Radiographers in Level 6 of the EQF (European Qualifications Framework) for professionals, which is the level where the degree is found in most countries within the EU and following the recommendations of the EFRS (European Federation of Radiographer Societies) European Qualifications Framework (EQF) level 6 benchmarking document for Radiographers endorsed by the ESR in October 2014.

With best regards,

Prof. Luis Donoso
ESR President
On behalf of the ESR Board of Directors
